**(54) CATIONIC  
SURFACTANT**

(57) Abstract:

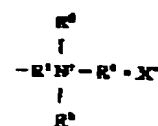

**PURPOSE:** To provide a specific cationic surfactant enhancing surface tension lowering capacity, smoothness and safety when adapted to a detergent being an applied use.

**CONSTITUTION:** A cationic surfactant is represented by formula I {wherein R1 is a same or different 1-18C substituted or non-substituted monovalent hydrocarbon group, a is 1 or 2, m and n are an integer of 0-20, Q is a group represented by either one of formulae II IX (wherein R2 is a 1-10C divalent hydrocarbon group, R3, R4 and R5 are a 1-4C alkyl group or a hydroxyalkyl group, y is 2 or 3 and X is a halogen atom or R4 SO4) and Z is R1 or Q}. Since this surfactant has excellent characteristics, it is useful as a skin washing agent such as a body shampoo or a cleansing

agent and a household detergent such as a dish-washing agent. Further, it can be utilized as cosmetics, medicines or a washing agent by putting the characteristics of the compd. to practical use.
